

XTM XP P8 BTE

The most powerful and reliable

The XTM XP P8 is the ideal solution for people with severe to profound hearing loss: They offer more speech understanding, sound quality and wearing comfort to those who need it most. With sophisticated technology, such as feedback prevention and noise management, the XTM XP P8 provides the functions and amplification that wearers need to stay connected to their world.

Special Performance Features

Automatic Directional Microphones

Recommended for users with a high demand for speech understanding in challenging, noisy listening environments. A&M hearing instruments now have the capability of automatic directional microphones offering improvements in difficult situations where you need to distinguish speech from noise.

Noise Management

A&M hearing instruments are equipped to ensure background noise is significantly reduced, giving the wearer better speech clarity and less unwanted interference.

Voice Ranger

The Voice Ranger makes sure that the target speaker sounds louder while maintaining the distant voices in the back for an easier listening experience.

Wireless synchronization

The wireless synchronization between the hearing instruments makes it easier for you to understand your conversation partner.

Smart Connect Compatibility

Via the Smart Connect you can enable Bluetooth connectivity to the hearing instruments. You can stream phone calls and music from the smartphone or other audio sources, into the hearing instruments.

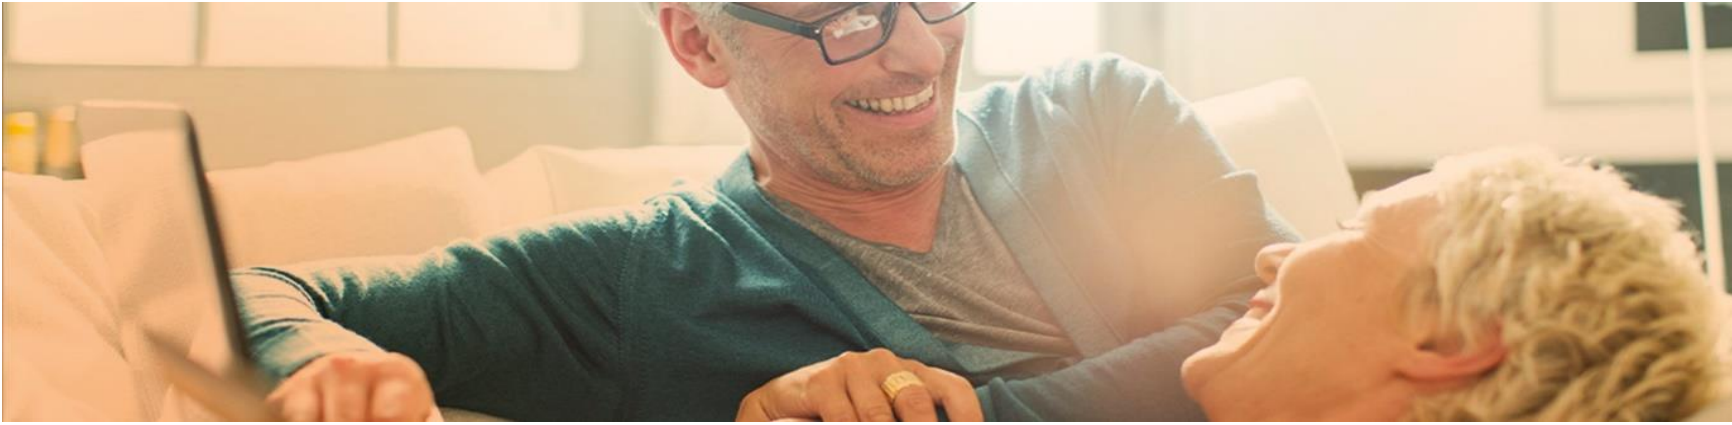

Feedback Preventer

Wearers of A&M hearing instruments are able to enjoy a more comfortable listening experience with reduced occurrence of feedback. The fast feedback preventer helps to avoid annoying whistling in the ears.

Accessories and Apps

Our accessories brings you the convenience of being connected and our apps makes adjusting your hearing aids discreet and easy.

Smart Connect

Slim, elegant and simple to use.

It is the perfect accessory for tech-savvy customers. The phone calls and music can be streamed from the smartphone into the hearing instruments. The Smart Connect can also be used as a remote control to adjust the volume of your hearing aids. You can easily switch the audio source and control your hearing aids using the [Smart Connect App](#)

Smart Transmitter

Connects TV and other audio devices with your hearing aids via Smart Connect in Dolby Digital sound quality.

Smart Key

A small remote for discreet control of hearing aids without the need of a smartphone. It is designed to fit on key ring, allowing you to bring it everywhere in a easy and convenient way.

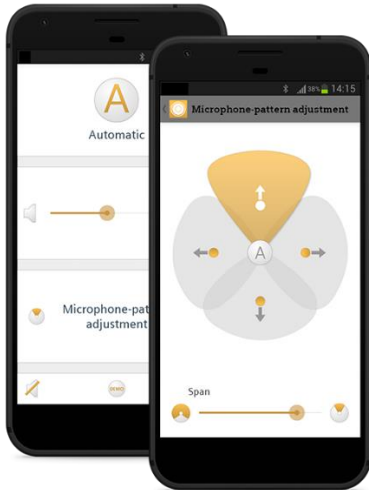

Smart Remote

An easy to use Remote Control that makes controlling the features of your hearing aids fast and convenient.

Smart Connect App

Turn your mobile device into a **Smart Connect** control center: The Smart Connect App allows you to control your Smart Connect & hearing aids and how they interact with all of your favorite audio devices. Whether it is watching TV, listening to music or talking on a Bluetooth phone – control is easy and discreet via the Smart Connect App.

Smart Remote App

Turn your smartphone into a remote control for your hearing aids! The app enhances discretion by hiding the remote control within your mobile device without the need for additional hardware. Full control of your hearing aids looks as subtle as checking for a text message.
